Abstract

Relationship between social intelligence and level of ambition for football players is one of aspects that benefit player in preparing himself to deal with circumstances surrounding him according to training age, regarding his level Social, his level of ambition and extent of effect of training life of football player in relationship between social intelligence and level of ambition And social and psychological aspect, especially social intelligence of football players, as well as level of ambition they have not received enough attention and study, which prompted researcher to put forward following responsibility: What is level of social intelligence among football players and extent of its relationship to level of ambition depending on training age?

Research aimed at -to get to know level of social intelligence, level of ambition for football players, relationship between social intelligence and level of ambition for training age among football players. researcher used descriptive approach, and sample was represented by first and excellent degrees in Basrah Governorate, who numbered 60 players, and social intelligence and level of aspiration used most important research needs, so existence of a relationship between social intelligence and level of ambition and most important conclusions is need for coaches and supervisors of football teams serious interest in level of social intelligence and level ambition for players.

Keywords: Social intelligence, level of ambition, training age, soccer players

1. Introduction

Individuals in their mental levels are different as a great difference, including genius and medium or moderate, including weak intelligence, and thus proportion of intelligence differs from one response to, and when we can notice this disintegration, its description, its miracle, analysis, and its disintegration, and its disintegration, and it's dispensing, like this phenomenon, to object of objective, accurate, Live is most intelligent and true intelligence, as it is a long -term mental component of term, knowledge, mental level of individual is determined by level of its success or its failure in affairs of its alive today or in field that it occupies or practices for purpose of hobby or field Boy So. player is a combined object that is not satisfied with its own himself, and he is using it and dealing with m during his presence in field of training units or sports competitions because characteristics of human life is social and its nature does not seek dispensing with colleagues of players. That dealing with teammates in team needs a mental and anonymity and ability to communicate with others, that is, it needs a variety of intelligence for a variety of ways ability to understand quickly and medium intelligence that needs effort and ability for sake of information to be recommended to him, and weak intelligence that is needed to repeat, repeat and care about dealing and disposing with him with caution in order not to understand behavior in a way that is different from what is meant for him. Various required needs, and ability to deal with conditions surrounding rationality and knowledge. Absence of player's behavior in dealing with others and variety of this dealings, and ability to persuade others, all of them need social intelligence, which is one of important and essential factors in adapting to team. All those around player are a technical and administrative staff.

It is known that every person has a special look about himself and every person who works what he can to maintain a good and balanced look at any time threatens any kind of deprivation or conflict. This view increases psychological tension. Himself and his ability and is surprised by a failed experience in achieving expected level in training units or

Corresponding Author: Amer Abbas Essa Faculty of Physical Education and Sports Sciences-University of Basrah, Iraq matches. This type of pregnancy or psychological tension may require a reconsideration of self -perception and this is a duty that is not easy for player, no matter how mature, capable or realistic thinking. Difference between level of ambition and level of performance in this case will cause a kind of frustration, so social intelligence is important in dealing with such situations to overcome psychological pressures and achieve required goals. Also, what player is in a training age of way player deals with circumstances surrounding all its possible details?

Hence, dealing with issue of relationship between social intelligence and level of ambition for football players on basis of cognitive and practical variables that represent one of aspects that benefit player in preparing himself to deal with circumstances and changes surrounding him according to training age of his level of ambition to reach performance that he aims to, as well as This benefits coach in knowing susceptibility of players according to overlap between intelligence of social player and level of his ambition and impact of training of football player in nature of relationship between social intelligence and level of ambition for him.

1.2 Research Problem

Through researcher's field experience in field of football, he believes that social and psychological aspect, especially social intelligence of football players, as well as level of ambition have, did not receive attention and sufficient study, which prompted researcher to put forward following responsibility: What is level of social intelligence among football players and extent of its relationship to level of ambition? In view of importance and role of social intelligence as an important and essential aspect of player's ability to deal with environment surrounding him, including colleagues, coach and technical staff, and is considered an important factor to achieve what player and coach aim in matches through players' solidarity and love for each or. therefore, problem was crystallized by researcher to conduct a study on social intelligence of football players and his relationship to level of ambition and understand nature of role played by training age that player possesses in nature of his dealings in various situations he is going through, where in training units or actual competitions, which appears in process Positive or negative interaction between player and an ambitious level, which is reflected on player and team in general.

1.3 Research Aims

- 1. Learn about level of social intelligence and level of ambition for football players.
- 2. Learn about relationship between social intelligence and level of ambition according to variable (training age) of football.

1.4 Research hypotheses

1-there are statistically significant differences between social intelligence and a level according to training variable of football players.

2- Existence of a statistically related relationship between social intelligence and level of ambition for football players.

1.5 Research Fields

1.5.1 Human Field

Players of first and excellent class in Basrah Governorate clubs.

1.5.2 Time Field

From 23/11/2021 to 20 /1/2022.

1.5.3 Spatial Field

Sports club halls are under study.

1.6 Research terms Social Intelligence

Ability to understand feelings and ideas of others, to deal with environment successfully, respond in a smart way, and appreciate positions according to social characteristics of person and based on his social awareness in an appropriate way.

Social Level of ambition

Ambition is known as that of goal that a specific person wants to achieve during his life and at all levels (Abdul Rahman, 2004)^[4].

2. Research methodology

Researcher used descriptive curriculum in style of survey studies to suit nature of research.

2.1 Research sample

Research community is one of players of excellent teams and first football in Basrah Governorate, for sports season (2021 - 2022), which number (175) players, according to records of Sub-Football Association in Basrah, and research sample was chosen in random way where number of members of a sample reached Research (60) players (34.29%) as shown in Table (1).

 Table 1: Research sample and distribution according to positions of players

Variable	Level of variable	Number of players	Percentage
Club class	Excellent degree	30	50
Club class	First Class	30	50
Training age	1-3 year	11	18.33
	4-7 year	26	43.33
	7-10 year	25	41.66

2.3 Research tools: (Two scales were used)

- Scale of social intelligence, and it consists of (81) paragraph (Muhammad Abu Hashem: 2008) ^[2]
- Scale of Ambition in sports field, and it consists of (36) paragraphs (Moawad & Sayed, 2005) ^[7].

2.3.1 Honesty and stability two measurements

Honesty and stability of two measurements were extracted by applying m to an exploratory sample of (10) football players from outside basic sample. Correlation coefficient was extracted. As shown in Table (2)

Table 2: Honesty and stability steps

Scale	Honesty	stability
Social intelligence	0.86	0.92
level of ambition;	0.88	0.94

Researcher conducted basic study from 23/11/2021 to 20/1/2022 by applying social intelligence measure and level of sports ambition to research Sam.

2.4 statically means

Researcher used Statistical Program Package for Social Sciences (SPSS), version 21

3. View results and Discuss

First- Show results of level of social intelligence among football players according to academic achievement.

Table 3: Mimetically averages in level of social intelligence among football players According to academic achievement variable

Scale	1-3 year	4-7 year	7-10 year
Social intelligence	243.1	320.8	380.7

 Table 4: Significance of differences in level of social intelligence between football players According to training age, using unilateral contrast analysis

Dimension	Source of contrast	Total square deviation	Freedom degrees	Medium square	F value	Indication
Social intelligence	Between groups In said groups Total	0.0102 0.028 0.130	2 57 59	0.021 0.001	103.89	0.001

It is clear from table (4) that re are statistically significant differences at level of significance (0.05) in level of social intelligence for football players according to training age,

and to determine differences, researcher used test of least moral difference (L.S.D) for dimensional comparisons between mimetically median, as shown in table (5).

 Table 5: Significance of differences in social intelligence between football players using Test least moral difference according to training age L.S.D

Scale	Player center	1-3 year	4-7 year	7-10 year
	1-3 year		77.7*	137.6
Social intelligence	Secondary			59.9
	7-10 year			

From Table (5) is with statistically significant differences on scale of social intelligence between players with training age (1-3) years old, (4-7) years old, and between (4-7) years, (7-10) years, and for benefit of those with experience7-10 years. Second, results of level of sports ambition for football players are presented according to academic achievement.

 Table 6: Mimetically averages at a level of ambition for football players Depending on training of training age

Scale	1-3 year	4-7 year	7-10 year
level of ambition	52.6	75.8	98.9

 Table 7: Significance of differences in level of sports ambition between football players According to training age, using unilateral contrast analysis

Dimension	Source of contrast	Total square deviation	Freedom degrees	Medium square	F value	Indication
Social intelligence	Between groups In said groups Total	0.037 0.026 0.063	2 57 59	0.019 0.009	41.024	0.001

It is clear from table (7) re are statistically significant differences at level of significance (0.05) in level of ambition for football players according to training age, and

to determine differences, researcher used test of least moral difference (L.S.D) for dimensional comparisons between mimetically circles, as shown in table (8).

 Table 8: Significance of differences in level of ambition between football players using Test least moral difference according to training age

 L.S.D

Scale	Player center	1-3 year	4-7 year	7-10 year
	1-3 year		23.2 *	46.3*
Social intelligence	Secondary			23.1*
	7-10 year			

from table (8) that re are statistically significant differences at level of significance (0.05) in level of ambition for football players according to training age, and to determine differences, researcher used test of least moral difference (L.S.D) for dimensional comparisons between mimetically circles, as shown in table (9).

Table 9: Results of relationship between social intelligence and level of sports ambition Football players have

Γ	319.6	53.4	79.8	24.7	0.081	0.001

Results Discuss

Tables (3-4-5) for level of social intelligence indicated that its level between players was high among players with training age (7-10 years,) n (4-7 years) and (1-3 years). reason is that increasing training experience contributes to increasing possibility of improving his dealings with environment surrounding it, where it is at level of situations that occur in training or competition with colleagues from or players in team as well as with training staff and club's administrative body, and that comes from positive way to accept opinions of interact with m in a way that ensures reaching a positive atmosphere within team group Which reflects positively on roles played by players on stadium and development that takes place in cohesion and communication between members of one team on field and need for players to be distinguished by duties assigned to it, While tables (6-7-8) for level of sports ambition indicated that level of sports ambition for football players with (7-10 years) was high, followed by those with training age (4-7 years) and n (1-3 years). reason for this is that players' ability to persist in training and determination of goals that y aim to achieve through relief on planning for future and high trust in capabilities and multiple capabilities, and this is consistent with what (Sharif; 2011)^[8] Indicated that origin in ambition is that player has an ambition to achieve A goal or a group of goals that he seeks to achieve in light of his capabilities and personal capabilities, and in light of experiences of success and failure", degree of ambition for a person during different stages of growth (Sharif, 2001)^[8]. results of Table (9) showed a positive correlation between level of social intelligence and level of sports ambition for football players, as value of correlation laboratory (0.81) and researcher believes that reason is that re are many objective factors that link social intelligence and level of ambition among players. Especially with regard to experiences of success, as many studies and scientific research have confirmed through association of level of ambition with experiences of success such as a study," which confirmed that success of sports team leads to feeling of its players with common happiness and high level of players' ambition of love and loyalty to team and thus to increase attractiveness towards ". Team membership (Abdul Hafeez &Bahi: 2001) ^[1] indicates that "difference that remains somewhat fixed for a certain period of time will be more coherent, stability and maturity, and some studies conducted in this field have shown that social stability leads to its cohesion" (Abdul Hafeez & Bahi, 2001) [1]. Consequently, high level of social intelligence leads to a high level of ambition of players with football, which confirms importance of level of social intelligence is linked to level of sports ambition among football players.

4. Conclusions and Recommendations 4.1 Conclusions

In light of research results and discussion, researcher reached following conclusions:

- 1. There is a positive correlation between social intelligence and level of sports ambition for football players.
- 2. Higher level of social intelligence, higher level of sports ambition for football players.
- 3. Presence of statistically significant moral differences in level of social intelligence and level of sports ambition in accordance with training experience.

4.2 Recommendations

- 1. Guidance with results of research in psychological and social preparation of football players.
- 2. Necessity of coaches and supervisors of football teams is serious interest in level of social intelligence and level of ambition for players.
- 3. Working to pay attention to benefiting from social intelligence and level of ambition for players in particular experience through awareness of importance of se factors.
- 4. Conducting studies on relationship of social intelligence with or variables.
